

AR-TRON

- DIRECTIONS:**
- (1) Rotate the disc until the desired date and time align
 - (2) Holding the planisphere with midnight at the top, face south and raise the planisphere over your head.
 - (3) The center of the oval will be the zenith of the sky and the edges of the oval are marked north, south, east, and west
 - (4) Use the planisphere to locate the major constellations.

CUT OUT OVAL AS ACCURATELY AS POSSIBLE
COMPLEMENTS OF AR-TRON TELESCOPES

INSTRUCTIONS FOR ASSEMBLING YOUR PLANISPHERE:

Carefully cut out both the blue indicator sheet and the white star disc. Then place the white star disc behind the blue indicator sheet. Now match up the current time and date, and your planisphere will show you the constellations visible.
